SKILLS JavaScript, Python, HTML, CSS, Sequelize, React, Redux, Flask, Express, MySQL, SQLite, Jinja, NPM, Node, Docker, SQLAlchemy, PostgreSQL, GitHub

PROJECTS

TeamViewer (*Python, Flask, SQLite, SQLAlchemy, PostgreSQL*)

[live](#) | [github](#)

- Allowed users to efficiently create and manage their sports team.
- Users can post information about their team such as location, team name,
- Those with a registered team can also list their roster of players as well as edit the information that is provided for each player.
- Can also add a log of scheduled games and statistics from those games, which can easily be queried by the team or by an individual player

Hard (*Python, Flask, SQLite, SQLAlchemy, PostgreSQL*)

[live](#) | [github](#)

- Worked in a team of 4 and worked within an agile work-flow.
- Utilized Github in order to properly manage branches of projects and merge without conflicts.
- Site allows users to create individual blog posts that can be queried and seen by other users.
- Also includes feature to comment and like others blog posts to create a more connected user interface.
- Allows a user to edit and delete any stories or comments they make and will be applied to the database.

shareBnb (*JavaScript, React/Redux, Sequelize, Express, Node*)

[live](#) | [github](#)

- A clone of airBnb which allows users to list properties which other users can book.
- Allowed users to edit their listed property as well as query for all properties available..
- Those with / without properties can easily book dates to rent the property based on dates.
- Has option for users to upload pictures for their properties

EXPERIENCE

Server

Ichiban

Mar 2019 - May 2020

- Maintained high standards of customer service during high-volume, face-paced operations (50+ customers at a time).
- Mastered point-of-service (POS) computer system for automated order taking.
- Assisted management with inventory control and stock ordering.
- Built loyal clientele through friendly interactions and consistent application
- Cross-trained and coordinated scheduling with team members to ensure seamless service
