## TECHNICAL SKILLS

Python, JavaScript, React, Node.js, Express, PostgreSQL, SQLAlchemy, Sequelize, Redux, Docker, Flask, Playwright, MySQL, SQLite, Jinja, GitHub, NPM, Prompt Engineering, Artificial Intelligence Integration

---

## WORK EXPERIENCE

### Software Engineer II

Feb 2024 – Present

Saleo, Remote

- Integrated AI-powered automation into internal tools, significantly enhancing engineering efficiency, streamlining workflows, and reducing manual workload by 250%.
- Automated API monitoring using Playwright, proactively identifying issues, reducing unexpected customer disruptions, and minimizing required changes by 75%.

### Software Engineer I

Jan 2023 – Feb 2024

- Integrated our application with 30+ customer websites, enabling seamless data population on their sites and improving overall user experience and data accuracy.
- Collaborated in creating reusable frontend components using React, reducing development time by 80% and improving consistency across the application.

### Software Engineer

Feb 2022 – Jan 2023

Scale AI, Remote

- Developed a user interface in React and TypeScript for 10,000+ users to rate and compare responses from large language models, ensuring AI data was sanitized and quality-controlled.
  - Collaborated on evaluating AI responses for prompts, reviewing over 100 responses per week and leveraging technologies such as JavaScript, TypeScript, HTML, CSS, and Python to ensure prompt quality and performance.
- 

## PROJECTS

### HARD

[Live](#) | [GitHub](#)

Medium Clone: Allows for users to share and interact with blog posts.

- Collaborated in an Agile environment as part of a 4-member team, consistently delivering high-quality features and improvements within project timelines.
  - Enabled users to create, publish, and discover personalized blog posts, with a growing database of 100+ posts, facilitating dynamic content sharing and user engagement.
  - Implemented a commenting and liking system that supports up to 100+ interactions per post, driving user engagement and fostering a social, interactive platform.
- 

## EDUCATION

Full Stack Software Engineering

App Academy – 2021

Bachelor of Arts | Philosophy - Honors

University of Texas - Austin – 2020
